MOST RELEVANT EXPERIENCE

Strategic Planning and Implementation Manager

Mar 2019 – Current

[The Australian Urban Research Infrastructure Network](#) (AURIN) provides infrastructure (data, software tools, and research expertise) for researchers in urban and social sciences. AURIN's remit includes increasing translation of research outputs to public policy, increasing academic research collaboration with the private sector, and increasing international collaboration with Australian research.

AURIN is funded by the Australian Government, under the National Collaborative Research Infrastructure Strategy (NCRIS) and led by the University of Melbourne.

- Represent AURIN with the Australian Government, State Governments, research partners, commercial partners, and others.
- Strategy, investment, and influence.
- Leadership. Directly lead multiple teams. This includes senior technical, research, legal and financial professionals. Oversee a multitude of cross-functional project teams, workgroups, and committees.
- Business development. Identifying opportunities, developing, and delivering project proposals, funding (grant) applications, tenders, and contracts.
- Operational Management. Accountable for finance including revenue, profit and loss, commercial partnerships, governance, risk, and compliance.
- Project Management. Manage AURIN's portfolio of research projects, including its High Impact Projects program and the Australia Urban Health Indicators project.
